2. We wish to caution TID that the present microscope mount is inadequate, and that as a consequence it was necessary to "jury-rig" an interim mount in TID/TAB's work area. The Development Branch is currently formulating Development Objectives for a superior mount for this instrument; to this end, TID/TAB is requested to perform a thorough operational evaluation of this instrument and provide P&DS with a written record of observations. Any constructive criticism of the instrument or suggestions for the new mount would be greatly appreciated.
